

SCREEN ENCLOSURES

espy® screen enclosures provide the ultimate solution for the protection and safety for commercial displays in the demanding retail environment of today.

Designed for demanding retail and high foot traffic areas, the robust aluminum extruded construction is strong while versatile and aesthetically attractive.

With a large surface for customised graphics, espy® screen enclosures can be supplied with your artwork for maximum brand promotion.

Design features such as tamper proof fixings, easy access for maintenance, internal mounting positions for PC hardware and high-flow ventilation louvers for effective equipment cooling, all combine to provide long term benefits for your commercial display investment.

DESIGNED FOR COMMERCIAL USE

- + Robust aluminum construction
- + Typical height/width: 1800H x 820W mm
- + Multiple high-flow air louvers for effective thermal ventilation
- + Tough baked epoxy powder coat finish
- + Secure tamper proof fixings and base for ultimate tamper protection
